Des Moines, IA 50312

Dear Joseph:

The City of Sabula is applying for I-Jobs II Disaster Prevention Grant program funding to assist in the cost of certifying their levee system to FEMA. The I-Jobs II program requires certification that an energy audit be conducted by a certified energy rater prior to the project.

There is no building to be constructed with this project. Therefore there is no energy audit to be required for this project.

Thank you for your consideration of the Sabula application. Please feel free to contact me if there is any further question on the application.

Sincerely,

Mark Schneider  
Community Development Director
